

Rearview Mirror Monitor with GPS Navigation, Bluetooth MP4 Speakers

Say goodbye to the annoyance of parallel parking and reversing... while ensuring you'll never get lost again! An all-in-one Bluetooth Rearview Mirror for hands-free cell phone calling, built-in GPS navigation, and multimedia on-the-go! It also features a 4.3 inch touch screen, high resolution reversing camera with night vision. This high-tech rear view monitor is one of the safest and smartest car gadgets available today.

This rearview mirror makes everything available directly in front of you, so that you can keep your eye on the road while tracking your destination. It is also an amazingly useful gadget when you're stuck in traffic, with its high resolution video playback, speakers for music playback and plenty of entertaining touch screen games!

The power of Bluetooth: Phone calls are made safe and easy with this Bluetooth Rearview Mirror. Just connect your Bluetooth-enabled cell phone to the device and you can talk directly to others with the mic and listen through the speakers. Finally, a way to keep your eye on the road without having to cut off cell phone communications!
